

Series 140 - Butterfly valves

Series BN Leistung BPE nozzle has a stainless steel body with tank interface surface, a gasket, a hygienic adapter and screwed fitting for adapter attachment. BPE nozzle is designed to be used as an aseptic connection to tank or vessel. Nozzle can be directly welded to the tank at the tank interface surface. Hygienic adapter is provided to connect with the flow-line. It is available in various end connections sizes and can be buttwelded directly to the tube. The gasket seal is provided to ensure completely safe and hygienic sealing of nozzle fittings.

- Compact and Robust design
- Multi position handle as standard feature for valve upto DN 100
- Two position handle as standard feature for valve starting from DN 100
- Several models of easily interchangeable manual handles and pneumatic or electric actuators
- Low pressure loss
- Traceability of components
